

HOW TO INSTALL DECORATIVE SCREENS

YOU CAN INSTALL YOUR OWN SANCTUM DECORATIVE SCREENS VERY EASILY WITH THE INSTRUCTIONS BELOW

INSTRUCTIONS

Sanctum screens are supplied pre-finished and ready to install as standard, and are pre-coated with two coats of our premium finish to highlight the panel's natural colour, maximise durability and make installation as easy as possible.

Choose from brown, chocolate (a deep, dark brown), or black / charcoal based coatings. While our timber is highly durable, and will naturally weather to a silvery colour over time, we recommend re-coating unpainted panels every 18 months with a quality decking product.

Sanctum screens are very robust, and with proper installation and a little routine care, they will look great for years to come. Panels can be handled and installed using standard woodworking tools. They can be cut to size using a hand or power saw, and nailed, screwed or glued. Ideally complete all cutting and drilling prior to installation, and apply appropriate protective coatings to all raw surfaces.

Simply mount securely around the perimeter of all the screens to eliminate flex and to protect the edges.

Options include:

1. Screw or nail to a secure, at surface.
2. Fix directly onto frame <40mm in thickness, so a 45mm screen border hides the frame.
3. Rebate a channel (cut a groove) in a frame to affix the screen into.
4. Sanctum supplies various timber and aluminium frames ready to go. Enquire in store for assistance.
5. Fix beading to either side of the screen to hold it securely.
6. Stand offs and a spacer behind the screen to mount off the wall and enhance shadowing.

CHECKLIST

- ☐ Screens
- ☐ Drill
- ☐ Hammer
- ☐ Screwdriver
- ☐ Hand or power saw
- ☐ Framing (if desired)
- ☐ Anchors (pan head screws)
- ☐ Stand offs (enable screen to be raised off backing wall)
- ☐ Personal protective equipment (safety glasses)
